

## Una app per Via Regina: tutti possono mappare!

Maria Antonia Brovelli, Alba Lucchese, <u>Marco Minghini</u>, Marco Negretti, Giorgio Zamboni

Politecnico di Milano, Dipartimento di ingegneria Civile e Ambientale (DICA) – Laboratorio di Geomatica, Polo Territoriale di Como

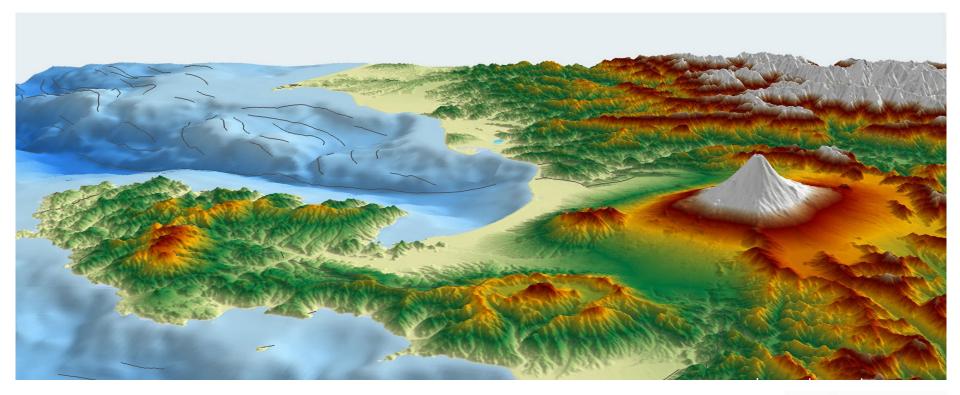

# Geographic Information 💢 📘 😲 Systems (GIS)

The set of software, hardware, people, institutions and standards, which together deal with acquiring, storing, manipulating, analyzing, managing and presenting all types of geographic data.

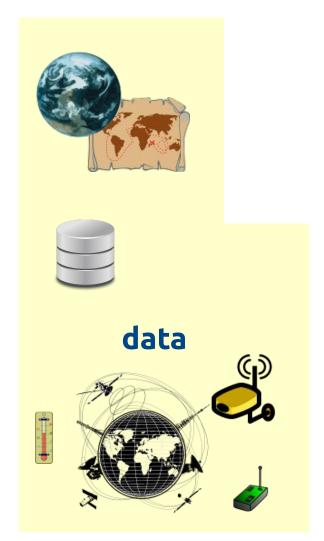

users

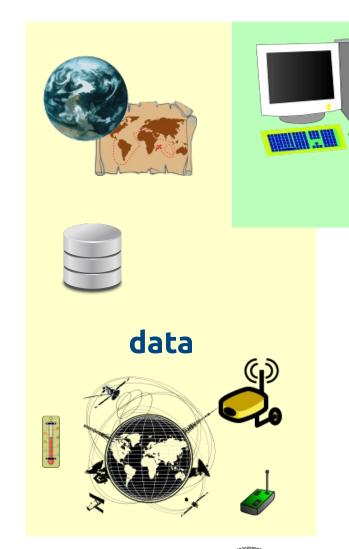

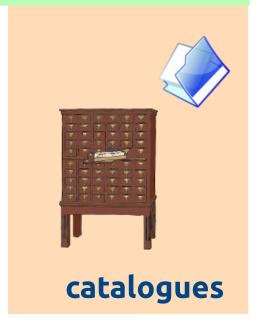

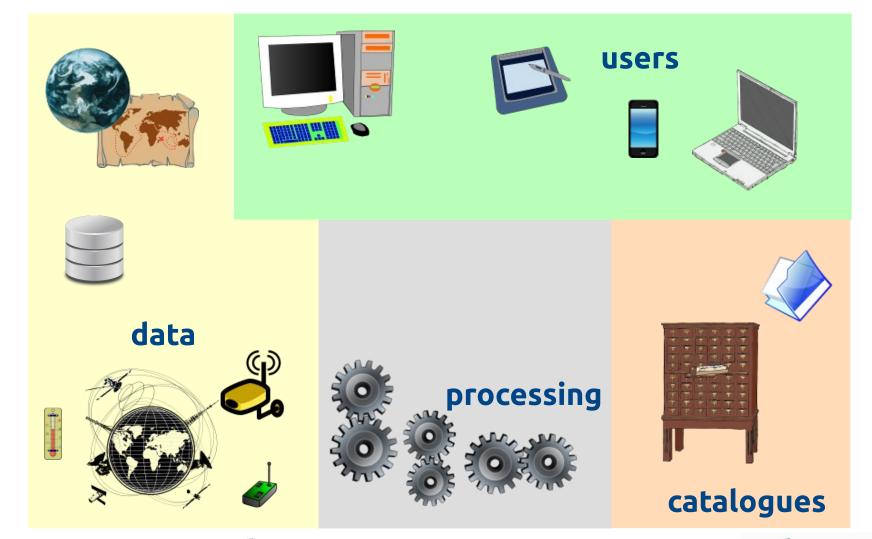

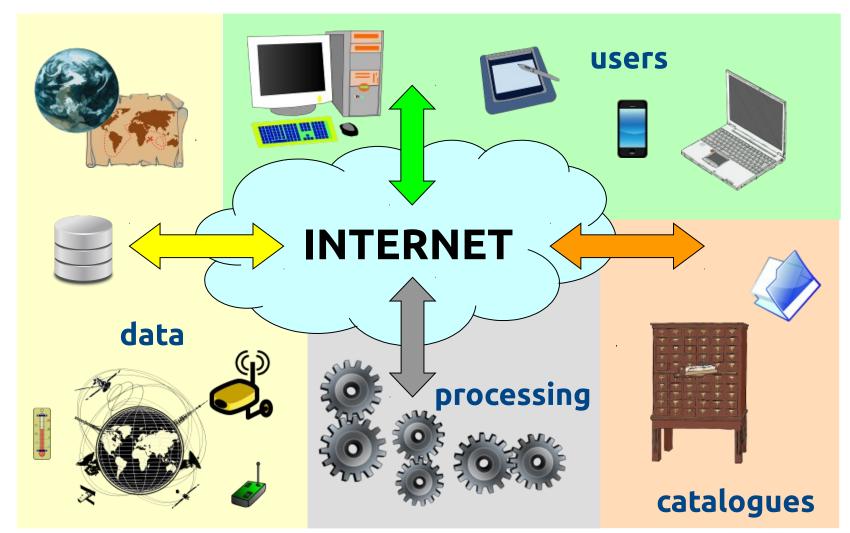

## GeoWeb 2.0

- Evolution of the 1990s GeoWeb 1.0
- Interactive tools allowing user participation in spatial data management
- OGC standards for geospatial interoperability
- GPS, AJAX and mapping Application Programming Interfaces (APIs)
- Neogeography (Turner 2006)
  - creation of maps through mash-ups of multiple data sources
- Volunteered Geographic Information (VGI) (Goodchild 2007)
  - the idea of humans behaving like sensors able to acquire geospatial contents
- Crowdsourcing (Howe 2006)
  - the act of a mass of users to share a job through an open call
- Diffusion of mobile devices equipped with sensors (GPS, camera, etc.)
  - users can easily perform real-time collection of georeferenced data

## Citizen science

- Set of practices in which citizens participate in data collection, analysis and dissemination of a scientific project
- Active or passive
- Explicit or implicit
- Classification
  - 'classic' citizen science: amateurs engaged in traditional scientific activities
  - community science: measurements and analysis carried out by amateurs in order to set action plans to deal with environmental problems
  - citizen cyberscience: use of computers, GPS receivers and mobile phones
    - x volunteered computing: citizens download data, run analyses on their own computers and send back data to the server
    - x volunteered thinking: citizens perform classification works
    - x participatory sensing: applications centered on mobile phones capabilities

# Web Mapping within the Via Regina project

- Crucial for disseminating knowledge and increasing tourism
- Responsible partners:
  - Politecnico di Milano Polo Territoriale di Como (project leader)
  - Scuola Universitaria Professionale della Svizzera Italiana (SUPSI)
- Planned activities & deliverables:
  - implementation of standard geoWeb services for data dissemination
  - creation of a Web platform for remote data upload and sharing
  - development of an application for data input from mobile devices
  - implementation of multi-dimensional viewers (2D & 3D)
  - design of an Augmented Reality application

# Web Mapping within the Via Regina project

  - implementation of standard geoWeb services for data dissemination
  - creation of a Web platform for remote data upload and sharing
  - development of an application for data input from mobile devices
  - implementation of multi-dimensional viewers (2D & 3D)
  - design of an Augmented Reality application
- Exploitation of Free and Open Source Software (FOSS)

Allows everyone to report interesting elements in the Via Regina area

#### Historical and cultural element

- Museum
  - ethnographic
  - \* thematic
  - gallery
  - x collections
- Religious building
  - church
  - oratory
  - sanctuary
  - x chapel
  - via crucis
  - fresco
  - abbey

- Civil building
  - \* historical building
  - contemporary building
  - traditional building
  - x monument
- Rural building
  - pasture/shed
  - snow deposit
  - x graa/metato (chestnuts drier building)
  - roccolo (system designed to catch birds)
  - x casello/turbino (buildings for the storage of perishable foods)
  - \* hydraulic structures
  - masseria (farm)

#### Historical and cultural element

- Archaeological element
  - x archaeological element
  - x archaeological site
  - v element inside a building
  - x single element
- Military building
  - x castle
  - \* tower
  - defensive wall
  - fort
  - trench
  - redoubt (secondary fort)
  - bunker

- Factory
  - furnace
  - trip hammer
  - x mill
  - x sawmill
  - quarry
  - x mine
  - rural factory

#### Morphological element

- Surface
  - pavement
  - natural material
  - x gravel
  - asphalt
  - steps
  - ford
- Bounding escarpment
  - x rock
  - ground escarpments
  - rock escarpments
  - support walls
  - boundary walls and railings
  - tree-lined avenues

- fence/barrier
- vertical plate
- Traffic support and manufactured product
  - x kilometric stone
  - \* border stone
  - stone marker
  - × isolated tree
  - inscription
  - fountain
  - ancient laundry
  - bridge
  - rest of bridge
  - tomb
  - underpass
  - tunnel
  - panoramic viewpoint

#### Tourist element

- Accommodation and overnight stay
  - \* hotel
  - \* hostel
  - × B&B
  - hut/shelter
  - camping
  - private accommodation
  - free accommodation
  - x agritourism
  - apartment
- Transport
  - bus stop
  - \* dock/ferry

- train station
- funicular and ski lift
- Services
  - pharmacy
  - x parking
  - x school
  - public safety
  - spring
  - city hall
  - post office
  - X WC
  - bank
  - park area
  - × ATM
  - info point
  - wifi hotspot

#### Tourist element

- Services
  - bike sharing
  - electric car charging point
  - \* hospitals/emergency room
  - hiking signs
- Food services
  - bus stop
  - x dock/ferry

- Products
  - wine shop
  - x craft
  - \* food/typical products
  - clothing shop

- Critical element
  - Morphological
    - x ford
    - X landslide
  - Structural
    - x crossing with traffic light
    - x crossing without crossing stripes
    - crossing with crossing stripes
- Warning
  - [whatever kind of warning the user specifies]

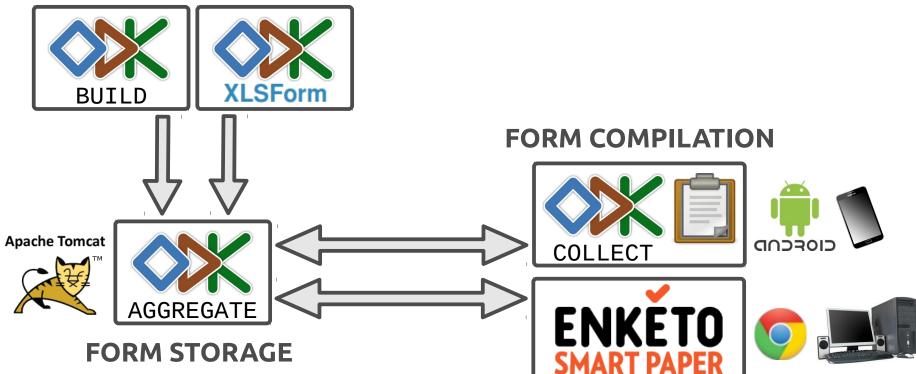

ullet Based on the suite of tools lack <

management of mobile data collection through a set of related applications

# FORM CREATION

Download of the Android app

- open the Google Play store
- look for the ODK Collect app
- download the app

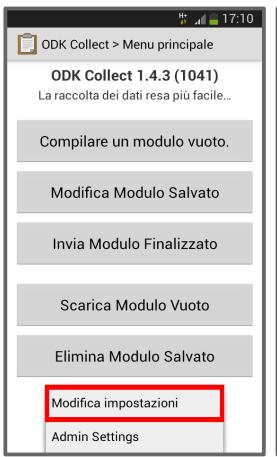

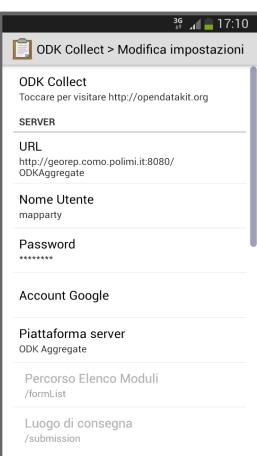

Configuration of the Android app
